FOR IMMEDIATE RELEASE: IMPORTANT NOTICE

POTENTIAL FOR TAP-A-DRAFT'S BROWN 6L BOTTLE TO RUPTURE IF IMPROPERLY USED

It has come to our attention that there may be a small percentage of **brown 6L bottles** sold (3 known of all sold so far) between **August 15, 2008 through August 31, 2009** that have the potential of rupturing if the CO2 cartridges in the Tap-A-Draft Dispenser are pierced while the bottle is in a vertical position; not the recommended horizontal position per the instructions. We realize that not everyone reads the instructions, and want everyone to know this **IMPORTANT DETAIL**.

STOP! NOT CORRECT!

CORRECT! Bottle is HORIZONTAL and on a table.

We are requesting that ALL customers that have purchased this bottle be notified of this potential hazard.

If you own one of these bottles, please **FOLLOW THE RECOMMENDED INSTRUCTIONS** for piercing the cartridges while the bottle is in a **HORIZONTAL POSITION ONLY**. Once the cartridges are pierced, the unit **MUST BE KEPT COOL** (max. 80°F or 26°C) and **REMAIN HORIZONTAL WITH TAP PROPERLY POSITIONED**. We are not aware of any bottles rupturing if used as recommended. An additional recommendation is to fill the bottle only to 1" – 1.5" (2.5cm–3.8cm) BELOW the bottle neck area.

Customers have the option to send all bottles to us for testing at no charge. We will test, replace where necessary, and return the bottle(s) free of charge. Please call us at (719) 686-6017 or e-mail support@tapadraft.com for shipping arrangements to be made.

If you have any questions, or concerns, please call (719) 686-6017 or e-mail support@tapadraft.com.
